Project Information

Product Name: XAI – Intelligence Workspace

Figma Design: <https://www.figma.com/design/0g5LtIhtSMolKc9eggb9o0/Xai-insight-new>

GitHub Repository: <https://github.com/Sabbir2809/xai-intelligence-workspace>

Live Demo: <https://xai-insight.vercel.app>

Product Overview

XAI – Intelligence Workspace is a single-page interactive product experience that shows how AI turns raw data into useful insights. The experience uses animation, interaction and a clean interface to explain the product in a simple and visual way.

Core Flow

Raw Data → Structured Intelligence → Actionable Insight → AI Automation

Design Goal

The goal of this project is to create a modern product experience that is:

- Clean
- Simple
- Interactive
- Easy to understand
- Smooth to use

The design focuses on clarity and purposeful motion instead of unnecessary effects.

Page Structure

1. Hero Section

The hero introduces the product with a short headline and an animated visualization.

Features:

- Animated particles represent raw data.
- The particles become organized while scrolling.
- Cursor movement adds a small interaction.

2. Insight Flow

This section explains how XAI works in three steps.

- Ingest Data
- Analyze with AI
- Generate Insight

Each step appears with smooth scroll animations.

3. Dashboard Preview

A simple dashboard shows how the product works.

It includes:

- Sidebar
- Statistics
- Chart
- Data Table
- Tabs

Users can switch tabs and interact with the dashboard.

4. Signature Interaction

This section contains an interactive 3D network.

Users can:

- Rotate the network
- Change the layout
- Watch the network respond to scrolling

User Flow

1. The user lands on the Hero section.
2. Scrolls through the three-step insight flow.
3. Explores the dashboard preview.
4. Interacts with the 3D network.
5. Finishes the experience by reaching the end of the page.

Design Decisions

- Built as a single-page experience for a smooth user journey.
- Motion is used to explain the product, not only for visual effects.
- The dashboard is designed to look like a real product.
- Reusable components keep the project clean and consistent.
- Dark and Light mode provide a better user experience.

Technology Stack

- Next.js
- TypeScript
- Tailwind CSS
- Framer Motion
- GSAP
- Three.js / React Three Fiber
- Lucide Icons

Summary

This project demonstrates how XAI transforms raw data into useful insights through clean UI, smooth animations and interactive 3D elements. The focus is on creating a simple, modern and engaging product experience with clear structure and purposeful interaction.
